Yami Custom brace - Slovakia 2019

1. Who are we?

“Yami Customs Composites” was founded in 2015. The founders and owners of Yana Mitroshkin and Andrei Mitroshkin. Headquarters is located in Russia. The company includes 6 divisions that produce more than 15 product items. These are individual products made from composite materials. Directions of products: personal protective equipment for extreme sports, medical orthopedic products, products for tuning sports and off-road motorcycles, various protective accessories for active people. Today, the company's products are sold under the following trademarks: Yamicustoms, Yamiarmor, Yamicases, and **Yamibrace**.

2018. In European countries, under the brand **Yamibrace**, individual carbon and titanium knee braces are sold for motor and extreme sports.

We hand craft the best individual knee protection - **Yamibrace**. This is PREMIUM 100% custom product – hand made. What are our braces for? First and foremost for professional sports, and more over for safe physical activities and just a happy active people’s lifestyle!

The most important thing we got to know for today is how to 100% reduce the risk of knee injuries leading to disability.

The combination of traditional craftsmanship and high technology is the cornerstone of our production system. Our innovative technical team are experts in engineering and tech as well as in specialized manufacturing processes for working with metals and composite materials.

We are fortune to get consulting services from top Medical Science PhDs, science researchers and analysts for constant development and improvement of our braces. We are all involved in various sport activities, including extreme sports. Professional athletes from many sports disciplines are testing our braces. These include motocross and enduro, ice hockey, downhill skiing and snowboarding, snowmobile races, surfing, wake, BMX, trekking to name a few. We monitor our competitors, carefully study their development, analyze, test, compare and do not repeat their faults.

That is why in the category of “high protection at an affordable price” our braces today are the best on the European market. Our clients receive a lifetime excellent support service and 3 years of free warranty for product and components.

We are not medical professionals, we do not write prescriptions, and we do not give medical advice. We are not engaged in rehabilitation of people after knee or leg injuries. But we know the anatomy of the legs and knees pretty well. We know all kinds of knee injuries in prof sports and everyday life and their causes. Therefore we know exactly how to best protect your knees from injuries!

2. Our knee braces

We make casts of your feet and then hand craft a knee protection system, which is called brace. This is attached to the leg and protects the knee from injury. In our braces, the knee joint is located in a secure safety capsule. Around the joint, there is a reliable protection - a titanium hinge. For better strength and security of the structure there are pads at the top and bottom of the composite hinge. They are 100% attached to the foot, firmly fixe the brace and completely replicate the relief of your feet. This design allows you to protect the knee joint, parts of thigh and the shin from injuries. At any degree of twisting of the leg in the knee joint, excessive flexion and especially extension in the knee, with frontal and lateral bumps in the knee, partially when striking the foot to name a few.

3. Our advantages

1. **We are experts in knee braces, we specialize in producing knee protection systems and we know all about this! We are passionate about making the higher innovate level of protection for your knees. This means we provide the best knee braces on the market.**
2. **Each pair of our braces is a unique number. We do not make braces for standard average leg sizes. This is a true level "PRO SPORT" and "Premium" custom product.**
3. **Our braces are hand crafted, from the very beginning to the final steps.**
4. **We measure your legs and make the mold which 100% copy your individual parameters.**
5. **Today, our braces are the most durable among all available in the mass market.**
6. **We provide the best free customer support and service.**
7. **We give a free product warranty - 3 years of intensive operation.**
8. **In today's market of level "PRO SPORT" brace manufacturers we have the most affordable price!**
9. **We have enough prepayment of 50%.**

4. Comparative table of class «PRO SPORT» braces characteristics for motocross and enduro

Competitor analysis January 2019 year

Brand	#Yamibrace Made in RF/Slovakia	CTi (OSSÜR) Made in Holland/Mexico	ORTEMA Made in Germany

Carbon fiber, titanium joints without cogs (much more durable)	Custom made, but no mold of leg. Wide range of products. Carbon fiber, titanium joints, but with cogs, which easily rub off when dirt gets in	Custom made. Wide range of orthopedic products. Carbon fiber, titanium joints, but with cogs, which easily rub off when dirt gets in
Weight	from 1600 gr.one pair	from 1450 gr.one pair	from 1500 gr.one pair
Rigidity of construction	98%	97%	96%
Joint protection	98	93	97
Comfort	98%	96%	98%
Guarantee	3 y. on joints guarantee	No joints guarantee	No joints guarantee
Service	24/7/365 Free service!	8/5/250	8/5/250
prepayment	50%	100%	100%
Price per pair	€1500	from €1700	from €4180

Our braces have best price to quality ratio. Our braces lead in the nomination - "bargain-hunting".

5. Medical disclaimer

Titanium frame brace provides a rigid fixation of the knee joint in the sagittal plane, reliable lateral stabilization and supporting effect due to an external support skeleton. Helps restore joint-muscular feeling and active stabilization of the joint due to the coordination of the work of own muscles.

If your physical condition is not satisfactory when examining and measuring your leg and knee, then we will ask you to bring a reference from the doctor treating you, which allows you to use our braces. Otherwise, we will not start making braces for you.

Cases in which you will need a reference from your doctor:

- When the last knee/legs injury was received less than 3 months ago.
- When the rehabilitation period according to the doctor's prescription is not over.
- When the rehabilitation results after the injury are not satisfactory.
- When the knee joint hurts or does not function well.
