PRACTICE & ENJOY THE SPORT

WE WILL PROTECT YOUR KNEES FROM ANY KIND OF INJURY

1. Who are we?

“Yami Customs Composites” was founded in 2015. The founders and owners of Yana Mitroshkin and Andrei Mitroshkin. Headquarters is located in Russia. The company includes 6 divisions that produce more than 15 product items. These are individual products made from composite materials. Directions of products: personal protective equipment for extreme sports, medical orthopedic products, products for tuning sports and off-road motorcycles, various protective accessories for active people. Today, the company's products are sold under the following trademarks: Yamicustoms, Yamiarmor, Yamicases, and **Yamibrace**.

2018. In European countries, under the brand **Yamibrace**, individual carbon and titanium knee braces are sold for motor and extreme sports.

There are many brands of knee braces. Buying a custom made high protection knee brace for extreme sports is one of those things to help prevent knee injuries. Of course, you will think about your safety on a motorcycle or other equipment for extreme sports. There are many reasons to buy an expensive custom brace. But in the first place among all the reasons is the awareness of the need to protect yourself before the accident. This is a preventive measure. It is formulated as follows. Be smart! Protect your knees in advance. Your goal is to stay healthy and not get your first knee injury! It is always better to prevent injury than to experience it.

There are very few models of knee braces for sports that really protect the knees from injury during severe accidents. This is a fact. Therefore, do not rush to buy your first knee braces without understanding how they were built and not understanding how they will protect your knees. It is worth noting that good knee braces are only those made especially for you.

We handmade the best custom knee protectors - **Yamibrace**. These are 100% customized PREMIUM knee braces. What are our braces for? Primarily to protect the knee from injury. **Yamibrace** braces are needed by professional athletes, extreme lovers and those people who lead an active lifestyle.

During 5 years of production, we have gained the necessary knowledge and experience. We now know how to protect your knees from sports injuries and how to keep your knee joints healthy and functional.

Our production system is based on the professional qualities and hands of our craftsmen. At the same time, we use high technologies, modern quality control systems and modern materials. Our team consists of specialists in the field of engineering, technology, production processes, sports medicine. We receive advice from leading doctors, sports coaches and sports institutes. Our knee braces are constantly and in real time tested by dozens of professional and amateur athletes. This allows us to find weak links in the in the design and

constantly improve it. Of course, we follow our competitors, carefully study their development, analyze and test their products, compare and do not repeat their mistakes.

In our team, we are all engaged in extreme sports. These include motocross and enduro, ice hockey, downhill skiing and snowboarding, snowmobiling, surfing, wake, MTB bikes, trekking and many more. We all protect our knees with **Yamibrace** braces that we make ourselves.

Based on the feedback from our customers, we can say that in the category "high knee protection at an affordable price" **Yamibrace** orthoses are the best on the European market. Our customers receive lifetime support and a 3-year free warranty on products, services and components.

At the same time, it must be said that we are not medical experts, we do not write prescriptions and do not provide medical advice. We are not doctors who rehabilitate people after knee or leg injuries. But we know the anatomy of the legs and knees well. We know all kinds of knee injuries in sports as well as in everyday life. We know the causes of injury. So we know exactly how to best protect your knees from injury!

2. Our knee braces

The design and manufacture of individual knee brace for extreme sports is not just a combination of composite elements with titanium. This is something more. An important goal of creating an individual knee orthosis is to protect the athlete from injuries to the knee and legs. That is why a knee brace fulfills a unique mission in the life of every person who uses it. This mission gives each bracket of **Yamibrace** the meaning of its existence.

Yami Custom knee brace made to fit your foot sets new standards for user comfort and confidence. Our braces fit exactly, stay in place and move so naturally that it will not feel that you are wearing a knee bracket. No unwanted switching is enjoyable, and the clamp has 0 pressure points. The **Yamibrace** titanium frame safety capsule supports your knee by creating an alternative load path to the knee joint, which distributes the forces from your ligaments to the stronger parts of your leg. Many leading European athletes choose **Yamibrace** to strengthen their knees without compromise, while hundreds of amateur athletes rely on **Yamibrace** to remain active.

With the ability to easily add or remove shock panels as needed, the staples adapt to different activities and sports. Outstanding multisport functions. Ideal for multisport applications. Removable patella shock panel. This construction is protected against impacts, temperature differences, UV rays, water, dirt and sand.

3. Our advantages

1. We are experts in knee braces, we specialize in producing knee protection systems and we know all about this! We are passionate about making the higher innovate level of protection for your knees. This means we provide the best knee braces on the market.
2. Each pair of our braces is a unique number. We do not make braces for standard average leg sizes. This is a true level "PRO SPORT" and "Premium" custom product.
3. Our braces are hand crafted, from the very beginning to the final steps.
4. We measure your legs and make the mold which 100% copy your individual parameters.
5. Today, our braces are the most durable among all available in the mass market.
6. We provide the best free customer support and service.
7. We give a free product warranty - 3 years of intensive operation.
8. In today's market of level "PRO SPORT" brace manufacturers we have the most affordable price!
9. We have enough prepayment of 50%.

4. Comparative table of class «PRO SPORT» braces characteristics for motocross and enduro

Competitor analysis January 2020 year

Brand	#Yamibrace model's MAX & LT Made in RF/Slovakia	CTi (OSSÜR) Made in Holland/Mexico	ORTEMA Made in Germany
Technology	Tailor-made (custom 100%), perfect, non-slip in all directions: down - up - to the side. Specialized in orthotics for motocross and enduro. Carbon fiber, titanium safety capsule, hinges without teeth (much more durable). Strong protection of the patella. Strong protection against knee rotation.	Tailor-made, small seating area on the leg, the knee is poorly protected against injuries from foot rotation and patella beating. The straps do not hold the orthosis well in water. Wide range of products. Carbon fiber, plastics, weak titanium hinges.	Tailor-made (custom 100%), larger foot area, weak titanium hinges with teeth (quick wear). Conforms well to the shape of the leg. The knee is poorly protected when it hits the patella. Inadequate structural strength in leg rotation.
Weight	≈1600 gr. one pair – MAX ≈ 1100 gr. one pair - LT	≈ 1250 gr. one pair	≈ 1200 gr. one pair
Rigidity of construction	98%	97%	96%
Joint protection	98 %	80 %	90 %
Comfort	98%	96%	98%
Guarantee	3 y. on joints guarantee	1 y. on joints guarantee	No joints guarantee
Service	Free service! 24/7/365	Paid service	Paid service
prepayment	50%	100%	100%
Price per pair	€1500	from €1700	from €3980

Our braces have best price to quality ratio. Our braces lead in the nomination - "bargain-hunting".

5. Medical disclaimer

Field of use:

ACL, MCL, LCL, PCL, PATELLA, rotational and combined instability. Athletes of all levels and strengths. Contact / percussion from low to high. EFFECTS Protects against overstretching. Offers stability (side stabilization). Specific range of motion. Relieves fatigue. Light, pre-assembled Yamibrace carbon frames in combination with a hinge system without teeth and modular components allow you to create your own knee brackets. Our titanium capsule offers excellent security:

- **rigid fixation of the knee joint in the sagittal plane,**
- **reliable lateral stabilization,**
- **Generates a general supportive effect through an external support skeleton. Helps to restore the joint-muscle feeling and active stabilization of the joint by coordinating the work of your own muscles.**

If we see that your knee and leg physical condition is unsatisfactory during the measurements, we will send you to your doctor. Only after your doctor has allowed you to do sports will we accept your order to manufacture them.

Cases where you need permission from your doctor:

- If the last knee / leg injury was less than 3 months ago.
- If the rehabilitation phase is not over due to an injury.
- If the muscle volume is not restored to the desired parameters and less than 75%.
- If the knee hurts or works poorly.
